

Nursing & Therapy Collaboration Improving QM Star Ratings

Vicki Warren, Clinical Resource | Kelly Alvord, Therapy Resource

The Sunstone Market increased their focus on improving quality measures and enhancing the care of their long term residents. We have developed an increased collaboration between our nursing and therapy departments to address the needs of our long term care residents. You can see that over the last three years, the trending of our QM 5 Star rating parallels the increased therapy involvement with our long term patient population. As we continue with this collaboration in an IDT approach, we expect to maintain our high quality measures.

NOTE: The above data was collected from 5 Sunstone Market facilities: Hurricane Health and Rehab, Orem Rehab and Nursing, Pinnacle Healthcare, Provo Rehab and Nursing, and St George Rehab. These facilities were part of Sunstone for all 3 years and provided long term care.
